COMPOUNDED SUBLINGUAL SEMAGLUTIDE SUSPENSION

☐ SEMAGLUTIDE 12mg-1ml in SUBMAGNA HMW ☐ #30ml

☐ ***INITIAL DOSE*** *This medication will NOT work if these directions are not carefully followed.* Do NOT eat or drink for at least one hour before and 30 minutes after swallowing.

Week 1: Place 0.3ml under the tongue for five minutes, or as long as possible, then swallow once daily.

Week 2: Place 0.4ml under the tongue for five minutes, or as long as possible, then swallow once daily.

Week 3: Place 0.5ml under the tongue for five minutes, or as long as possible, then swallow once daily.

☐ ***TRANSITION FROM INJECTABLE DOSE*** *This medication will NOT work if these directions are not carefully followed.* Do NOT eat or drink for at least one hour before and 30 minutes after swallowing.

☐ **1.7mg Injectable:** Place 4.8mg (0.4ml) under the tongue for five minutes, or as long as possible, then swallow once daily.

☐ **2.4mg Injectable:** Place 6mg (0.5ml) under the tongue for five minutes, or as long as possible, then swallow once daily.

☐ ***MAINTENANCE DOSE*** *This medication will NOT work if these directions are not carefully followed.* Do NOT eat or drink for at least one hour before and 30 minutes after swallowing.

Place _____ ml under the tongue for five minutes, or as long as possible, then swallow once daily.

After one month on a maintenance dose, may increase by 0.1ml as directed by the provider. Please note, titration dosing to achieve the best patient outcome is two to three months. For best results, patient hormone levels should be checked and balanced before starting sublingual Semaglutide suspension (see hormone info sheet for more information).
